

Privilege Management

Roles and Privileges

- Create roles and assign accounts with specific management privileges to particular folders, players, groups, media, etc.

Zone Privileges

- Assign roles or accounts with certain management privileges for specific zones.

Enhanced User Convenience

Preview on PC

- Use any computer to see basic layout and content sequence.

Remotely Retrieve Log Files

- Access the server and player log remotely through a browser rather than retrieving it onsite.

Microsoft Active Directory Compatibility

- Import usernames and passwords directly from Active Directory for login accounts.
- Import account's roles and privilege settings to use in WCM.

Creative Screen Layout

Translucent Logo

- Add a translucent logo to overlay scheduled content.

Ticker Enhancement

- Support up to 2 ticker zones at the same time.
- Flexible in ticker scrolling direction – up or down.
- Design for different reading habits; left to right, or right to left.

New Tools!

Multi Screen Layout Design Tool

- Set up multi-screen layout, resolution, and orientation in targeted players.
- Support up to 16 screens.

Remote Management Tool

- Enable or disable the remote desktop of the selected WebDT Signage Appliances or Edge Servers.
- Remotely rotate screen orientation and adjust the resolution via LAN.

Frame-based Synchronization across Multiple Screens

- Play synchronized video across multiple player (showing same frame on each screen).
